

Anurag Goswami

Software Engineer

Seeking a challenging role in ReactJS development where I can utilize my 2.5 years of experience and expertise in ReactJS, HTML, and CSS to contribute to the success of dynamic projects and teams.

SUMMARY

- Proficient in ReactJS, HTML, CSS, React native, Redux and JavaScript.
- Strong understanding of front-end development principles and best practices.
- Experience with state management libraries such as Redux.
- Knowledge of responsive design and cross-browser compatibility.
- Familiarity with Agile development methodologies.
- Excellent problem-solving and communication skills.
- Ability to work effectively both independently and as part of a team.

TECHNICAL COMPETENCY

Operating Systems	Windows
Technical Profile Competencies	HTML, JavaScript, CSS, React, GIT, Material UI, React Native

EMPLOYMENT DETAILS

Feb 2022 - Current	Software Engineer <i>Amantya Technologies, Gurgaon</i> Inventory Management system: An Inventory Management System frontend focuses on providing a user-friendly interface for managing inventory data, facilitating tasks such as tracking stock levels, updating product information, and generating reports. Through intuitive design and seamless navigation, it aims to streamline inventory-related processes, enhance visibility into stock movements, and empower users with efficient tools for inventory control and analysis. Netprizm: Netprizm application, developed to test and validate the range of various UEs in different field scenarios in a simulated environment. This application aims to monitor specific KPIs across different components in a single platform. Its sole purpose is to provides the framework to emulate the live network environment in a specific region and ascertain how the simulation performs when mapped in near real-time conditions.
--------------------	--

Roles & Responsibilities

- Developed responsive and user-friendly web applications using **ReactJS, HTML, and CSS**.
- Implemented state management using **Redux** for efficient data flow and improved application performance.
- Worked closely with UI/UX designers to implement pixel-perfect designs and ensure consistency across platforms.
- **Optimized** applications for maximum speed and **scalability**.
- Collaborated with backend developers to integrate **frontend components with server-side logic**.
- Conducted code reviews and provided constructive feedback to team members to maintain code quality and adherence to best practices.
- Actively participated in **Agile development processes, including daily stand-ups, sprint planning, and retrospective meetings**.
- Collaborated with backend developers to design **RESTful APIs for seamless integration** with frontend applications.
- Conducted thorough testing and **debugging** to identify and resolve issues in a timely manner.
- Contributed to the improvement of development processes and **coding standards** within the team.
